<b>Office Action Summary</b>	<b>Application No.</b> 10/550,875	<b>Applicant(s)</b> VAN DEN ENDEN ET AL.	
	<b>Examiner</b> Peguy JeanPierre	<b>Art Unit</b> 2819	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement filed on 9/27/2005 has been considered.

### ***Drawings***

3. The drawings are objected to because blocks 11, 12, and 13 in Figure 4 must be labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

4. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
5. The preferred layout of the specification (Background of the invention; Summary of the invention; Description of the Drawings etc...) is missing (see 37 CFR 1.77(b)).
6. The first line of the specification must indicate that "The application is a 371 of PCT/IB04/50323 filed on 3/24/2004.

***Claim Rejections - 35 USC § 112***

7. Claims 1- rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly et al. (US 6,650,258).

With regard to claims 1 and 9-11 Kelly et al. disclose in Figure 1 sample rate converter that converts an input sample rate to an output sample rate. The system provides an input data stream at an input sample rate, interpolates or up-samples the input data stream by a factor M to generate an intermediate sample rate and decimates or down-

samples the interpolated signal by a factor N. The system of Kelly further provides a variable rate adapter (see Figure 11) that operates on the intermediate data stream to produce an output sample having a higher sample rate than the input sample rate (see col. 3, lines 2-6) or to produce an output sample rate with a lower sample rate than the input sample rate (see col. 3, lines 16-20). With regard to claims 2-8, Figures 9 and 10 disclose the different values of the variable rate adapter; the control values as shown in the Figure can be fixed increased or variable based on the frequency of the interpolating and decimating scheme (see col. 6, lines 44-51).
